## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a method of making a tissue construct.

Group II, claim(s) 18-26, drawn to a single continuous tissue construct.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claims 18, at least, is anticipated by or obvious over L'Heureux et al (FASEB Journal, 1998). L'Heureux et al teach a single, continuous living tissue construct in the form of a human blood vessel formed by wrapping a sheet of cultured vascular smooth muscle cells around a tubular support, and then wrapping a similar sheet formed of cultured human fibroblasts around the first sheet (See L'Heureux et al, abstract). Consequently, the special technical feature which links claims 1-26, a single continuous living tissue construct formed by the edge contact of two cell populations, does not provide a contribution over the prior art, so unity of invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named

Art Unit: 1651

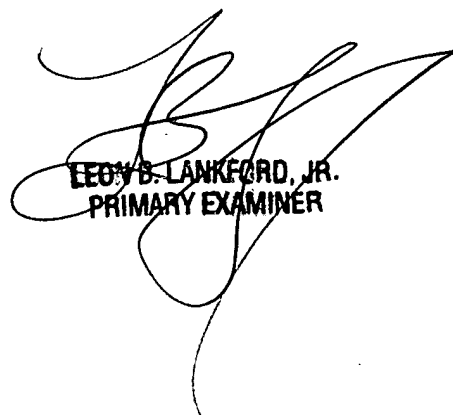

inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
